Re-state the Assignment

This application displays a slideshow of 6 different images. Each slideshow displays a random shape being produced. You can press the mouse to see another output. Press key 1 to 6 to get different images.

Interaction Diagram

Reflections

I had a fun time creating this piece. It was interesting to think about how I was going to implement the different shapes and interactions into each picture. I decided to do the random color fills in the object as it represents the lights shown at these festivals. The intense and rapid color change provides the festival atmosphere. Many people do not know about these festivals so I implemented the mouse click to show people what the photo of the current festival is. Overall, I enjoyed seeing my project come together.
